PRAKTIKA

Tire without a stripe; optimal choice for everyday recreational riding in all terrain conditions.

SUPER

Identified by the characteristic yellow stripe: medium carcass construction and compound, especially designed for high speed Enduro, ideal in hard dry conditions.

FAST ENDURO

SUPER FAST

Identified by the characteristic yellow and purple stripe: medium carcass construction and compound with improved and narrower cross section design, especially designed for high speed Enduro races in dry and hard conditions

FAST ENDURO

SUPER LIGHT

Identified by the characteristic green stripe: light, soft carcass construction and gummy compound, especially designed for medium speed technical Enduro, ideal in wet slippery conditions.

TECHNICAL ENDURO

ULTRA LIGHT

Identified by the characteristic green and purple stripe: light, soft carcass construction with narrower cross section design and gummy compound, especially designed for medium speed technical Enduro, ideal in wet/semi wet and slippery conditions.

TECHNICAL ENDURO

SUPER SOFT

Identified by the characteristic double green stripe: light carcass construction with ultra gummy compound, especially designed for low speed extreme Enduro, ideal in wet slippery conditions.

X TREME ENDURO

SUPER SOFT PRO

Identified by the characteristic double green and purple stripe: extremely lightweight, ultra-flexible carcass with an ultra-gummy compound provides an increased contact patch for excellent grip in challenging, low-speed technical sections.

X TREME ENDURO

SUPER

Identified by the characteristic yellow stripe: medium carcass construction and compound, especially designed for high speed Enduro, ideal in hard dry conditions.

FAST ENDURO

SUPER SOFT

Identified by the characteristic double green stripe: light carcass construction with ultra gummy compound, especially designed for low speed extreme Enduro, ideal in wet slippery conditions.

XTREME ENDURO

SUPER LIGHT

Identified by the characteristic green stripe: light, soft carcass construction and gummy compound, especially designed for medium speed technical Enduro, ideal in wet slippery conditions.

TECHNICAL ENDURO

ICE

Identified by characteristic white stripe: thicker reinforced carcass with specially formulated compound that remains flexible and elastic even in freezing temperatures down to -10 °C. Perfectly suited for winter riding disciplines such as studded tire use, motoskjoring, and ice motocross.

PRAKTIKA

Tire without a stripe; optimal choice for everyday recreational riding in all terrain conditions

SAND TERRAIN

Motocross competition tire made from the hardest tread compound for soft and sandy terrain.

SOFT MEDIUM TERRAIN

Motocross competition tire made from a medium hard tread compound for soft to medium terrain.

INTERMEDIATE TERRAIN

Pitcross tire made from softer tread compound for intermediate terrain.

MEDIUM HARD TERRAIN

Motocross competition tire made from the softest tread compound for medium to hard terrain.
